Full Stack C# .Net/PHP Developer

TECHNICAL SKILLS

<i>Programming Languages</i>	<i>C#, PHP, JavaScript, HTML5, CSS3, SQL (T-SQL/MySQL)</i>
<i>Web Technologies and Frameworks</i>	<i>ASP.Net MVC, ADO.Net, Entity Framework ORM, Angular JS, Bootstrap UI, Skeleton CSS, XML, JSON, AJAX, RESTful API, LESS/SASS/SCSS</i>
<i>Databases</i>	<i>SQL Server 2014, MySQL</i>
<i>Tools/Methodologies</i>	<i>Visual Studio 2017, Microsoft SQL Server, Apache server, Microsoft Azure, Adobe Brackets, SDLC, Microsoft Office, Git, Adobe Photoshop, Adobe Premier</i>

DEVELOPMENT EXPERIENCE

All Things Delivered Business Site Rebuild

Technology: ASP.Net MVC, C#, Entity Framework, Braintree API, SendGrid API, FourSquare API, HTML, CSS, JavaScript, jQuery, Bootstrap

Rebuilt the customer-facing portion of the All Things Delivered website using .Net MVC and Entity Framework. Designed a relational SQL database to store delivery, customer, and restaurant data. Menu data is scraped from the FourSquare API and stored on a database as a daily automated Azure web job. Braintree API used for PCI-Compliant payment processing, and SendGrid API used for email delivery. Deployed on Microsoft Azure cloud hosting.

Space Time

Technology: JavaScript, jQuery, HTML, CSS

Designed and built a proprietary game engine and world building tools with Javascript. Created a physics model and collision detection algorithm. The game is a 4th dimensional 2D platformer, where the player controls a small blue alien as he travels through the multiverse to collect various objects.

What's in My Bar?

Technology: AngularJS, CocktailDB API, HTML, CSS

Built an angular app which uses the CocktailDB API to calculate which mixed drinks the user can make with the selected ingredients, and other drinks they could make with one additional ingredient.

Weatherly

Technology: HTML, CSS, JavaScript, jQuery, bootstrap, Yahoo weather API

A weather app that sources data from the Yahoo! Weather API. The background image changes to match the weather condition.

Library Card Catalog

Technology: C#, ASP.Net

A simple C# Console application to manage a library catalog. Serializes/de-serializes catalog data to a local CSV file.

Delivery Tip Tracker

Technology: PHP, MySQL, HTML, CSS

Developed a database-driven tip tracker for pizza delivery tips. Features include a time clock to track estimated paychecks, a tip entry system that produces weekly reports of total tips, average tips per hour, and other useful information.

Recipe Optimization Tool

Technology: PHP, MySQL, HTML

Developed a tool that returns a list of recipes to make in order to optimize efficient ingredient use. It uses a greedy algorithm to compare conflicting ingredients among recipes, and selects the recipe that would cause the fewest conflicts.

EXPERIENCE

All Things Delivered – Owner/Software Developer

2015-2017

Developed an on-demand delivery service that connected customers needing items not traditionally delivered with independent contractors willing to deliver them. Designed and developed a PHP/MySQL e-commerce application with a driver dispatch and delivery management system.

Coding Temple, – Chicago IL – Software Developer

2017

Built web applications written in C#, JavaScript, HTML, CSS, jQuery, AngularJS and bootstrap. Used the .NET MVC framework and Microsoft SQL Server.

- Developed a full stack e-commerce application using HTML5, CSS3, Angular JS, C#, MS SQL, Bootstrap, ASP.NET and MVC 5
- Created the project wireframe and layout for all of the pages in the e-commerce application
- Designed a normalized relational database using SQL Server Express and T-SQL
- Implemented Braintree API to allow PCI compliant payment processing

EDUCATION

College of Dupage, Web Development, Business, Engineering

2009-2011

Bradley University, Mechanical Engineering

2012-2014
